Sunshades and thermal shields to enhance yours products

We manufacture thermal shields, under Freezline brand, for vertical and horizontal industrial refrigeration cabinets. These thermal shields are available in either manual or motorised versions and can be manufactured to exact customer specifications. Freezline thermal shields provide insulation against heat and guarantee energy savings and simplicity of use.

Vertical manual & slowed down thermal shields

They are characterized by a manual vertical movement (can be slowed down).

Dimensions: standard or personalized.

MODELLO FREEZLINE 2000

Electric vertical & slaved thermal shields

The motors are subjected under strict reliability tests.

Our modular system allows, with only one motor, the more blinds aligned activation.

Dimensions: standard or personalized.

MODELLO FREEZLINE 3000

Horizontal thermal shields

They were designed to be a perfect fit for industrial refrigerated display units.

They are characterized by an horizontal manual movement. Dimensions: standard or personalized.
